

Boysenberry

Puree Typical Analysis

Vintner's
HARVEST

PREMIUM WINE MAKING PRODUCTS

Boysenberry Puree is prepared from ripened, washed and sorted boysenberries. Puree may be made from fresh berries during the harvest in July; or it may be made from frozen puree stock during the off season months. The product contains no preservatives and no additives

Typical Analysis

Measurement

Data

pH:	3.0 - 3.6
Brix:	10.0° - 15.0°
Specific Gravity:	1.040 - 1.061
Viscosity:	12 - 24 cm/min (Bostwick at 70°F)
Color:	Dark red, typical of cooked boysenberries

Storage:

Product is shelf stable, no refrigeration is necessary for food safety of unopened bags. Refrigerated or frozen storage is highly recommended for optimal color and flavor quality. Thawed product should not be refrozen. Shelf life is 18 months from production date.

Physical properties vary due to seasonal variation of agricultural commodities
