

ALEMBIC CONDENSER AND DOME TOP:

Turn your still into a pot still for distilling when you want the natural flavours of the wash to come through.

WITH OVER 20 YEARS IN THE MARKET, STILL SPIRITS IS THE LEADER IN HOME DISTILLING AND FILTRATION SYSTEMS THAT MEET AND EXCEED EVEN COMMERCIAL STANDARDS.

SIMPLE STEPS TO HOME DISTILLING

1 [MIX]

Mix water, sugar, carbon and yeast in the fermenter. Allow to sit and ferment for 7-10 days.

2 [DISTIL]

Distil your mix to separate the pure alcohol.

93%
ABV

3 [DILUTE & FILTER]

Dilute the alcohol down to 50% ABV by adding cool drinking water.

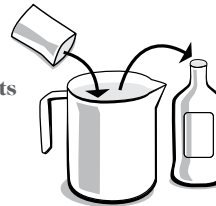

Filter the alcohol.

50%
ABV

4 [FLAVOUR]

Flavour your alcohol by adding your favourite spirits or liqueur essence from the Still Spirits range and diluting down to required ABV% for drinking.

A GUIDE TO DISTILLING AT HOME

TURBO 500 STILL SYSTEM

The ultimate still in home distilling, the T500 is a must for anyone who wants to produce large quantities of extremely clean, pure alcohol. The T500 allows you to collect an astonishing 95% of the possible alcohol from the wash.

This comes out at an amazing 93% alcohol purity which beats every other still on the market.

FEATURES

304

Still made from high quality 304 stainless steel construction.

4.5 HRS

Takes as little as 4.5 hours to distil 25 L (6.6 US Gal).

**8 L
AT 40% ABV**

Yields 8 L (2 US Gal) of alcohol when watered down to 40% ABV.

7 DAYS

Excellent quality spirits and liqueurs in as little as 7 days.

93%/95%

Produces 93% ABV strength alcohol from the still and recovers 95% of the alcohol in the wash resulting in an extremely clean, pure spirit.

HUGE SAVINGS

Save money by making your own quality spirits at a quarter of the price of commercial equivalents.
